THE TOUGHEST PEN AROUND

Stainless Steel writing instruments are durable, easier to sanitize than plastic, and resists corrosion

PRESSURIZED BARREL

Due to the pressurized barrel mechanism which allows writing upside down and at extreme angles, some ink blobbing may occur when the pen is left retracted for an extended period of time.

X·701

Stainless Steel Writing Instruments

- Durable, stainless steel barrel with anti-reflective matte black finish
- Pressurized barrel allowing the pen to write on challenging surfaces (extreme angles, upside down) and temperatures ranging from -30 degrees F to 250 degrees F
- Convenient lanyard loop making it easily tethered to a belt loop, clipboard, or workstation.
- Refillable with K-Refill (pack includes 2 refills)
